

Factory engine overhaul – the economical alternative.

A factory overhaul is the economical alternative to a Genuine Remanufactured engine, and is above all worthwhile for older vehicles. Your truck engine will come back from the factory fully overhauled and renewed – naturally in unrivaled Mercedes-Benz quality and with the same level of care as a Genuine Remanufactured engine.

In some markets the costs of a factory overhaul can be set on the basis of the damage, resulting in a particularly favorable price. There are 3 alternatives depending on the urgency and the extent of required repairs.

“Individual” factory overhaul

The most economical solution for price-conscious customers.

- Your engine is individually overhauled by the manufacturing plant.
-

“Standard” factory overhaul

The most suitable solution for most customers.

- Advance delivery of an already overhauled engine specifically for your vehicle.
 - Delivery time: 6 to 10 working days.
-

“Express” factory overhaul

The particularly quick solution for customers in a hurry.

- Advance delivery of an already overhauled engine within 24 hours.
- Express service at an attractive price.
